

THE WAY TO THE FUTURE

TOMORROW SERIES

Revised technology shaping a modern design. The 2-post lifts of the **Tomorrow Series** of Rotary raise your workshop immediately into the future. Tested for 20000 cycles and designed for TEq-Link online internet connection, your workshop is prepared for all innovations that are yet to come.

- + **RELIABLE & POWERFUL:** solid performance even under demanding conditions
- + **FLEXIBLE & VERSATILE:** three possible installation widths to satisfy any workshop needs and applicable to a wide range of different vehicles
- + **MODERN & PREMIUM:** a contemporary look meets the premium quality of components

Equipped with an acoustic anti toe trap system. Free from mechanical foot guards.

The new column geometry allows for quick replacement of the nut.

Internal carriages running on lubricated sliding guides, protected from the external environment, that ensures a longer life to the sliding elements.

The geometry of the arms was designed to lift anything from city to long-wheelbase cars.

HIGHLIGHTS IN DETAIL

1 Short 3-stage arms and long 2-stage arms with quick fittetelescopic rubber pad.

2 Electronic synchronization.

3 Wide rubber protected areas.

+ Aluminium pulley with cooling function.

+ Long lasting bearings.

+ 50% longer bronze load nut.

+ Motors with reinforced and cooling casing.

+ Solid automatic arm locking.

SPM32-S

Load-bearing base: installation also possible on floors having levelness problems or insufficient capacity parameters and cement thickness.

Lowered load-bearing platform: H 50 mm.

SPM32-C

Base with smaller size that reduces the work area space.

A set with two plates allows lifts to be installed even on a quality of concrete lower than required.
