

ROT.D32HP-BMW

Ref: BMW H3 503 577

**BMW
GROUP**

**ROTARY
SOLUTIONS**

DE.

Kompaktes 3D Achsmessgerät mit komplett kabelloser Mess- und Übertragungstechnik.

Kompensationsfreie BMW Radhalter.

Leichte unempfindliche 3D Reflektoren.

Passt auf den kleinsten Arbeitsplatz.

Einfache Chassiskontrolle zur Unfallvermessung.

Neue BMW Fahrzeugdatenbank-Software.

EN.

Compact 3D wheel aligner with completely wireless measuring and data transfer.

Equipped with specific BMW no run out clamps.

Light and easy to handle targets.

Ideal also for work bays with limited space.

Easy chassis control for damaged vehicles.

New BMW vehicle database software.

IT.

Assetto ruote 3D compatto, con sistema di misura e trasmissione dati completamente senza cavi.

Griffe BMW che non richiedono la compensazione.

Target 3D maneggevoli e leggeri.

Ideale anche per le postazioni di lavoro di dimensioni ristrette.

Controllo rapido del telaio per veicoli accidentati.

Nuovo software banca dati veicoli BMW.

FR.

Appareil de géométrie 3D compact avec mesure et transfert de données entièrement sans fil.

Équipé de pinces spécifiques BMW sans compensation.

Cibles légères et faciles à manipuler.

Idéal pour les ateliers à espace restreint.

Contrôle aisé du châssis des véhicules accidentés.

Nouveau logiciel de base de données véhicules BMW.

ES.

Alineador de ruedas 3D compacto con medición y transferencia de datos totalmente inalámbricas.

Equipado con abrazaderas específicas BMW para evitar la excentricidad.

Objetivos ligeros y fáciles de manipular.

Ideal también para talleres con espacio limitado.

Control sencillo del chasis en vehículos dañados.

Nuevo software de base de datos de vehículos BMW.

Underlined data		Measurement data out of tolerance	
Yes		Valid values (Tread depth)	
Yes		Valid values (Tyre Pressure)	
Yes		Does the vehicle conform to the condition as delivered by the plant? (no chassis-related modifications or retrofits)	
Yes		Are all suspension components in a proper condition?	
Yes		Position the steering wheel balance in the steering wheel.	
No		If the steering wheel angle or drive axle angle is outside the tolerance range, the total toe is not evaluated. Only the partial toe is evaluated.
